HOPPERTOP

Weigh Hopper Venting

THE TOP CHOICE FOR HOPPER VENTING IN CONCRETE PLANTS

HOPPERTOP is a COMPACT air filter specially developed for venting of mechanically loaded cement weigh hoppers in concrete plants.

Dust which is separated from the air flow by a single patented WAM® cartridge filter element drops back into the hopper after an integrated automatic reverse air jet cleaning system inside the weather protection cover has removed the dust particles from the filter elements.

Features

- Compact dimensions
- Stainless steel design
- Hinged cover
- High-performance quality filter cartridge
- Cartridge removal without tools
